Area Directors Note

Resilience is the theme of the Sesame Streets in Communities packet that will be dispersed across our area in January.

Resilience, what is that??? I remember about ten years ago when that topic started to pop up, it was during a Lemonade for Life training and it became one of my favorite words.

However, resilience is a word that is hard to define. The Oxford Language defines it as: the capacity to recover quickly from difficulties. I myself would take out the word “quickly” because some things take time to recover but the goal is the recovery or adjust to the new circumstance.

Emergency Plans

Emergency plans were utilized on December 15th at many places across our four counties. Thankfully, there were no injuries reported and people were given advance warning of the pending storm.

Now is the time for childcare entities to ask, “Did our current emergency plan work?” While everything is fresh in people’s mind, it is the best time to

Wikipedia may say it better:

“Psychological resilience is the ability to mentally or emotionally cope with a crisis or to return to pre-crisis status quickly. Resilience exists when the person uses “mental processes and behaviors in promoting personal assets and protecting self from the potential negative effects of stressors”.

However, my favorite is good old Webster: Resilience: the ability to become strong, healthy, or successful again after something bad happens.

Whatever definition you prefer, give resilience some thought and how it is important in a child’s life.

review a plan and make changes if needed.

Emergency plans can be daunting to do but at times like December 15th we realize the importance of them.

Consider making a plan for your family if you do not have one. [Ready.gov](https://www.ready.gov) is a great resource for anyone wishing to make a plan.
